

# “Student Quotes”

“It has been beneficial to me as the class is full of people who are wanting to learn, put effort into their work and this makes me try harder.”

“BEING IN THE EAGLES PROGRAM HAS BEEN A GREAT EXPERIENCE. I ENJOY THE CHALLENGING WORK AND THE OPPORTUNITY TO PUSH MYSELF ACADEMICALLY. THE CLASSES KEEP ME ENGAGED AND HELP ME GROW IN WAYS I DIDN'T EXPECT.”

“Everyone is learning at a similar pace, we are constantly being challenged by the teachers”.

## How to Apply for 2027

Applications close  
**31 July 2026**

# Subjects

EAGLES classes provide a differentiated curriculum in English, Humanities, Mathematics and Science.

Years 7 – 9 EAGLES students will be in the same class groups for English / Humanities, and Mathematics / Science. However, in Year 10, class groups will be in each individual core subject.

Students will experience elective subjects alongside their peers thus developing skills across the Arts and Technology fields in addition to their academic skills via this program.

- Excellence:** Signifying the high standard of student achievement within the group
- Ambition:** Highlighting the drive and determination of students to succeed
- Goal-oriented:** Emphasizing the importance of setting and achieving student academic goals
- Leadership:** Denoting the ability to lead and inspire others, creating positive role models
- Effort:** Recognising the hard work and dedication required for individual success and to be the best version of themselves
- Success:** Celebrating student accomplishments and victories.

# Expectations

Students in EAGLES will moving through the Australian Curriculum at a faster pace than their peers. To facilitate this, they will have more homework than other classes in order to consolidate their learning and allow for progression to extension topics within each unit.

Access to a laptop is also desirable but is not a prohibiting factor in securing a position in the program.

# Review and Monitoring

Students are invited to join the EAGLES Extension program based on academic excellence. For Year 6 students, a parent application will put forward students for consideration in the Year 7 cohort.

Participation is reviewed each semester, with teachers closely monitoring student progress to ensure they continue to meet the program's high standards.

# The Program

Bundaberg North SHS's EAGLES Extension Program is a school-based program designed to meet the needs of our high performing students in Years 7-10. Each core subject provides extension of curriculum content in a challenging and engaging learning environment, with a focus on academic achievement and preparing students for future academic pathways.
