

# BYOD information - Setting up your device / Installing Microsoft Office

1. Go to the Bundaberg North SHS website: <https://bundabernorthshs.eq.edu.au/>
2. Go to Facilities, Computers and Technology

scan me with your phone camera!

3. Scroll down the page to see the information on 'Connecting to the school network' and 'Office 365 Software'

## Connecting to the school network

BYOD connection to the school network is through BYOXLink, a purpose built system for Queensland state BYOD schools. It provides a secure, efficient platform that enables Bring Your Own Devices access to internet, mail and learning resources on the school network.

To use the new BYOXLink service, students will need to enrol their device into the Microsoft Intune Company Portal. Devices can be prepared at home by following the relevant help guide for your Device operating system (Windows, MacOS or iOS)

Before you begin, please ensure you have completed the [Pre-Enrolment checks](#)

- [BYOXLink How to guide to connect a student's IOS device](#)
- [BYOXLink How to guide to connect a student's MacOS device](#)
- [BYOXLink How to guide to connect a student's Windows device](#)

YouTube how to videos are available at the bottom of the [Technology Support](#) page.

## Office 365 software

All students enrolled at a state school (from Prep – Year 12) can access Microsoft Office 365 software free of charge. If your device does not have the Office programs installed, or if your software subscription has ended, students can log into Microsoft Online via <https://portal.office.com> using their school email and password to download and install the Office programs. Click on the links below for instructions on downloading and installing Office 365 for Windows and Mac.
